

Enhancing Study Environments at Walsall Healthcare NHS Trust

Introducing the Library's New Study Pods and Booths

Walsall Healthcare NHS Trust is delighted to unveil the latest additions to the Manor Learning and Conference Centre Library: state-of-the-art study pods and booths. These new facilities are designed to cater to the diverse needs of its staff and students, offering a serene and private setting for study, work and collaborative meetings.

For Individual Focus or Collaborative Efforts. Nestled within the library on Route 302, the booths offer dedicated spaces perfect for group activities and focused project work. For situations requiring utmost privacy, the study pods are equipped with enhanced sound insulation, making them suitable for one-on-one discussions and virtual meetings.

Bookable Convenience. Ease of access is a priority and as such, the pods can be conveniently booked online, available for use in up to three-hour increments. Each pod is fully furnished with power outlets, Wi-Fi, lighting and comfortable seating, ensuring a seamless study or work session.

Tailored to Individual Study Style. Whether users prefer a solitary study environment or a duo setup, the booking system allows clients to select a pod that aligns with their preferences.

A Commitment to Educational Excellence. Jacqui Watkeys, Head of Library, Knowledge and Education Centre Services, noted, "*These facilities reflect [Library and Knowledge Services](#) ongoing commitment to enhancing the library experience and supporting the continuous learning of our Trust's staff and students.*"

Ned Hobbs, Chief Operating Officer and Deputy Chief Executive, emphasized, "*The Trust deeply values the academic progression of our healthcare staff. These new study pods and booths are a testament to our dedication to providing an optimal learning environment, especially for those colleagues who may be neurodivergent or have other needs who thrive in tranquil and private settings.*"
